### UGAM AD 2.20 Local aerodrome regulations

Local traffic regulations can be obtained on request via email: [info@airports.ge](mailto:info@airports.ge) or by phone (+995) 599263624 or (+995) 599263621.

#### 1 Removal of disabled aircraft from runway

When an aircraft is wrecked on a runway, it is duty of the owner or user of such aircraft to have it removed as soon as possible. If a wrecked aircraft is not removed from the runway as quickly as possible by the owner or user, the aircraft will be removed by the aerodrome authority at the owner's or user's expense.

### UGAM AD 2.21 Noise abatement procedures

NIL

## UGAM AD 2.22 Flight procedures

### 1 General

Flights within Ambrolauri FIZ shall be conducted in accordance with the Visual Flight Rules.

AFIS service is only provided within the operational hours of the unit. Outside the AFIS operational hours only FIS service is available.

The AFIS unit provides aircraft with information on known traffic and available information on meteorological and aerodrome conditions.

### 2 Procedures for IFR flights within Ambrolauri FIZ

Not applicable.

### 3 Radar procedures within Ambrolauri FIZ

Not applicable.

### 4 Procedures for VFR flights within Ambrolauri FIZ

- Flight plans (FPLs) are required to be submitted for operations within Ambrolauri FIZ;
- Flights shall be conducted with vertical visual reference to the ground;
- Two-way radio communication shall be maintained with the Ambrolauri AFIS unit on the unit frequency;
- Inbound aircraft shall establish communication with the AFIS unit 5 minutes before crossing the FIZ boundary. However, contact establishing can be delayed until the moment it becomes practically possible.

### 5 VFR routes within Ambrolauri FIZ

No special arrival and departure routes are established for VFR traffic.

## UGAM AD 2.23 Additional information

Intense activity of small size bird flocks takes place daily from 08:00 to 11:00 (local time) (during summer season from June to September) when birds fly from resting area across the approach of RWY 11 to their feeding area, river. Only small size birds are active, which doesn't effect flight safety if strike to aircraft. Their flight height varies from 328 FT (100 M) to 550 FT (170 M) AGL. From 16:00 to 19:00 (local time) the same activity as described above takes place in reverse when the birds return to their resting area.

Dispersal activities includes shooting sound produced of liquid gas cannons allocated near the RWY 11/29.

Also modifications of the airport environment are under way to reduce, if not eliminate, the wildlife hazard. No landfills in the vicinity and no open waste-bins on the aerodrome. Ground and grass cover is treated properly.
