Changes: Chart reissued

ATC SURVEILLANCE MINIMUM ALTITUDE CHART - ICAO

AERODROME ELEV. 1578'
TRANSITION ALTITUDE 11000'

APP 134.600
TWR 119.000 (Primary)
128.000 (Secondary)

TBILISI/Tbilisi (UGTB)

Notes:

1. The chart may only be used for cross-checking of altitudes assigned by a controller while using an ATS surveillance system.
2. The ATC surveillance minimum altitudes are calculated to provide obstacle clearance in accordance with ICAO PANS-OPS Doc 8168. The minimum altitudes are protected for low temperatures to minus 14°C (UGTB temperature). Within the Sector 4 minimum altitude of 7500 FT will be used when temperature drops below minus 10°C
3. The minimum altitudes are so defined to maintain ACFT in controlled airspace and within the coverage of communication and surveillance facilities.
